ABOUT ME

As a backend-focused Full-Stack Developer, I have developed backend systems integrated with OutSystems applications by designing tables and views on SQL Server.

I have actively taken part in corporate projects, building data-driven systems that support business processes.

During development, I tested and validated REST API integrations using Postman.

I have built user-friendly applications with clean interfaces to address real business needs, such as a Visitor Management Automation system.

I am a team-oriented developer aiming to take backend responsibility in long-term and sustainable projects.

PROFESSIONAL EXPERIENCE

Information Technologies & Software Specialist

NART Insurance and Reinsurance Brokerage Inc.

January 2024 – September 2025

- Took part in developing corporate web applications and dashboards using OutSystems.
- Built data-driven backend systems supporting business processes through SQL Server and REST API integrations.
- Tested and validated API integrations in corporate applications using Postman to ensure accurate and reliable data flow.
- Developed robotic process automation (RPA) solutions with UiPath to reduce manual operations.
- Actively contributed to the development, maintenance, and technical updates of company websites using WordPress, HTML, CSS, and JavaScript.
- Performed technical improvements and updates for projects including nart.com, nartonline.com, yoneticisorumluluk.com, and klinikdeney.com.

Intern – Information Technologies & Software

NART Insurance and Reinsurance Brokerage Inc.

July 2023 – December 2023

- Supported development and content management processes in WordPress-based corporate web projects.
- Gained hands-on experience in core development processes, workflows, and corporate project disciplines by working closely with software teams.

PROJECTS

Earthquake Alert and Employee Status Tracking System

OutSystems | SQL Server | REST API

- Developed an application to quickly identify the status of company employees during post-earthquake crisis situations.
- Built a centralized data collection structure allowing employees to report their safety status through the system.
- Designed backend-focused architecture using SQL Server data structures and REST API integrations to support crisis management workflows.
- Provided a data-driven tracking infrastructure that accelerated corporate decision-making processes.

Visitor Management Automation System

OutSystems | SQL Server

- Developed an automation system that digitalized internal visitor entry processes.
- Built a database-backed structure covering visitor registration, tracking, and reporting workflows.
- Delivered a solution that standardized processes and increased operational efficiency by reducing manual operations.
- Designed a user-friendly and well-structured interface to ensure ease of internal use.

BLACK MESA – Corporate Landing Page

HTML | CSS | JavaScript

- Developed a responsive landing page for a fictional corporate brand in line with modern web standards.
- Built a clean and sustainable frontend architecture using semantic HTML, modern CSS (Flexbox & Grid), and Vanilla JavaScript.
- Gained hands-on experience in corporate web design, user experience, and frontend structuring through this project.
- Published the project as open-source on GitHub.

C# Learning & Backend Fundamentals (Ongoing)

C# | .NET | GitHub

- Created a topic-based GitHub repository to learn and reinforce C# and backend development fundamentals.
- Made steady progress by developing examples on variables, data types, algorithm logic, and core programming structures.
- Built a sustainable and extensible learning structure by documenting all work and progress.
- Actively working on strengthening my backend development foundation through continuous hands-on practice.

TECHNICAL SKILLS

Backend & Database

- SQL Server
- MySQL
- OutSystems (Web & Reactive Applications)
- Backend Data Modeling (Table & View Design)

API & Integration

- REST API Integrations
- API Testing & Validation (Postman)

Frontend

- HTML, CSS, JavaScript
- Responsive Web Design
- WordPress (Theme & Content Management)

Tools & Project Management

- Git / GitHub
- Jira
- Postman
- Visual Studio Code

EDUCATION

Computer Programming (Associate Degree)

Beykoz University | 2022 – 2024

Information Security (Double Major, Associate Degree)

Beykoz University | 2023 – Ongoing

LANGUAGES

Turkish: Native

English: Intermediate

CERTIFICATIONS

- Web Frontend Development – Enstitü İstanbul İSMEK
- OutSystems Mobile Application Development – Udemy
- Web Programming (HTML, CSS, JavaScript) – Turkcell Geleceği Yazarlar
- Algorithms and Programming with C# – Turkcell Geleceği Yazarlar
